The Austrian building materials group Wienerberger has reached an agreement to acquire a controlling interest in Gruppo Italcera, a leading global manufacturer of high-end ceramic surfaces. The transaction involves the sale of shares held by private equity firms Mindful Capital Partners (MCP) and Miura Partners, alongside their respective co-investors.

The deal is expected to close by the end of April 2026. Following the completion of the majority sale, the existing shareholders will retain a minority stake in the company, with a full exit planned for 2027. The acquisition allows Wienerberger to significantly expand its presence in the premium ceramics market, integrating Italcera's industrial excellence into its global construction materials portfolio.

Giovannelli e Associati assisted Mindful Capital Partners throughout the transaction, specifically managing the tax profiles and the overall legal structuring of the sale. The firm's team was led by partner Diego De Francesco, supported by counsel Andrea Tognon and Elisa Resmini.

The strategic integration of Gruppo Italcera into the Wienerberger network represents a major consolidation within the European industrial sector, specifically targeted at the luxury architectural and design markets.
